## ***GENERAL STRIKE OF ALL METALWORKERS NATIONAL DEMONSTRATION IN ROME FOR THE CONTRACT***

The contract of the metalworkers has lapsed since almost a year now.

The wages of the workers are poorer, statistical data and the personal experience of all of us says that it is not possible to make ends meet till the end of the month.

Nevertheless, Federmeccanica, Unionmeccanica Confapi and Cooperatives stick to the mere recovery of inflation and their maximum disposability reaches a slightly more real measuring thereof.

They mark an area, which according to the most optimistic forecasts, goes a little beyond 70 euro.

This is disrespectful towards metalworkers!

This is unacceptable!

**WE WANT OUR DUES!**

The metalworkers are claiming 105 euro for recovering and safeguarding the purchasing power of their wages and 25 euro for all workers, as a separate compensation for all workers, which can be reabsorbed within the company level bargaining rounds which will take place in the next four years.

Fim – Fiom and Uilm also want a regulation of the labour market, in order to reduce precariousness and for making work relations more stable.

The counterparts want unilateral flexibility of work times and continue to consider labour costs as the only competition lever for an industrial system, which is unable to face innovation.

The metalworkers strike for:

- The national contract.
- The right to negotiate labour conditions.
- Fair wages.
- The respect of the workers.
- Against an industrial model which has brought crisis, precariousness and unemployment.

**WE WANT THE RENEWAL OF OUR CONTRACT NOW  
BECAUSE IT IS THE WORKERS' RIGHT !**

**TAKE PART IN THE DEMONSTRATION IN ROME AND  
SUPPORT IT ALSO BY CONTRIBUTING.**
